BEYOND THE MATCH CHALLENGE

DUBAI FINTECH SUMMIT • INNOVATION STAGE

LALIGA PULSE™

The Synchronous In-Match Fan Arena, Optical Intelligence & Fan Capital Network

Transforming 90 minutes of passive broadcast viewing into a synchronized, co-operative global stadium powered by Mediacoach 25fps optical tracking and a non-speculative loyalty micro-economy.

1. The Second-Screen Attention Leak

THE CHALLENGE

84% of Gen-Z Fans Multi-Screen During Matches

During live 90-minute broadcasts, fan attention fragments across TikTok, WhatsApp, X, and betting apps. LALIGA generates the emotional surge, but third-party platforms harvest the screen time and monetization.

85%+ of Global Fans Never Visit Spain

Remote international fans in MENA, LatAm, and Asia feel detached from the physical stadium culture. Existing fantasy games are asynchronous, while sports betting is restrictive, predatory, and inaccessible to youth.
