BEYOND THE MATCH CHALLENGE | DUBAI FINTECH SUMMIT 2026 | USD 10,000 FINALIST

# LALIGA PULSE™

The Synchronous In-Match Fan Arena, Optical Intelligence & Fan Capital Network

| | |
|---|---|
| CHALLENGE HOSTS: | LALIGA & Ignyte |
| SHOWCASE STAGE: | Innovation Stage, Dubai FinTech Summit |
| CORE TELEMETRY: | Sportian Mediacoach TRACAB® 25fps Optical Mesh |
| AI / PREDICTIVE: | Microsoft Azure Beyond Stats ML Engine |
| REPOSITORY & WIKI: | github.com/Ranjeet7680/LALIGA-PULSE- |

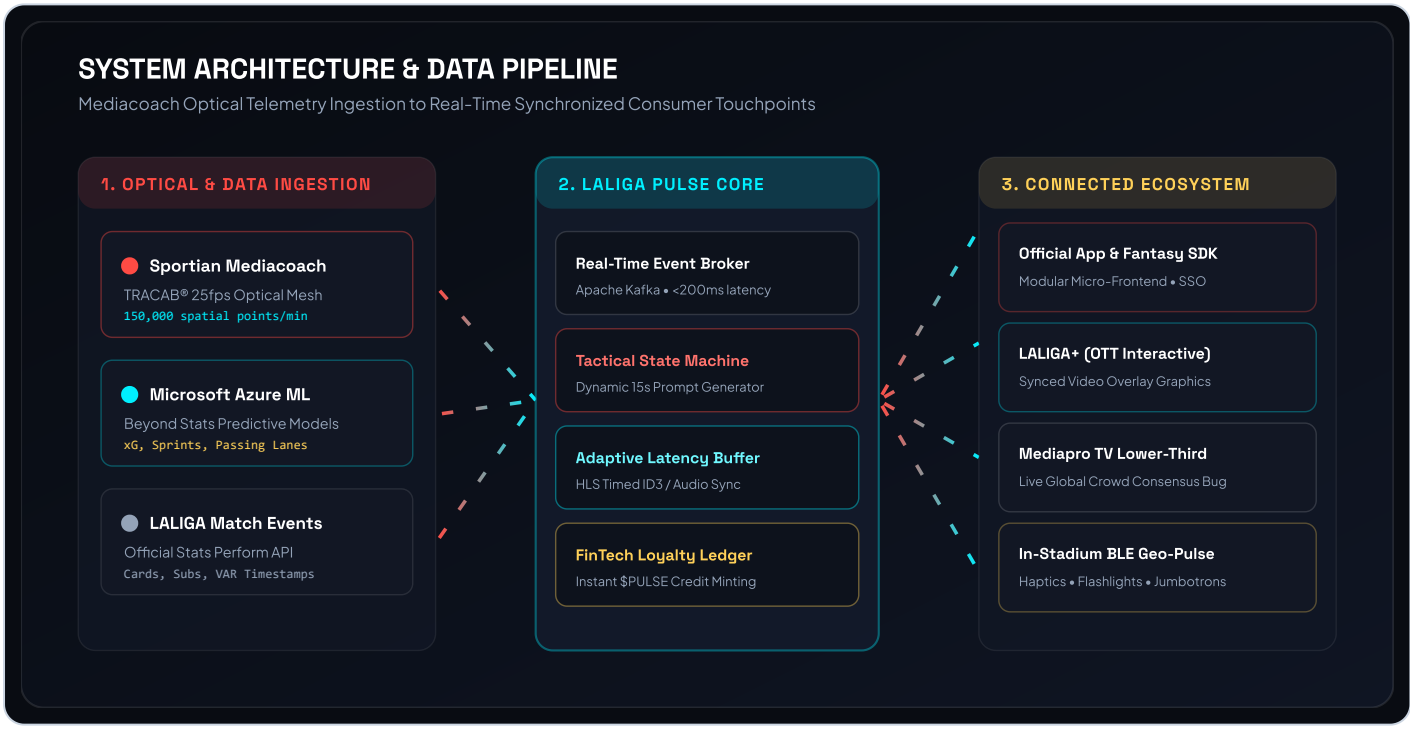

# 1. Executive Summary & Strategic Rationale

Historically, football consumption has been structured around the passive viewing of the 90-minute linear match. Today, digital habits, mobile ubiquity, and multi-screening have decoupled younger generations from linear broadcasts: **84% of Gen-Z fans multi-screen while watching football**, toggling across WhatsApp, TikTok, X, and stats feeds.

Furthermore, **over 85% of LALIGA's 200M+ international fans will never visit the Santiago Bernabéu or Metropolitano**. For these fans, fandom feels geographically disconnected.

**LALIGA PULSE™** is a synchronized, real-time fan participation layer and closed-loop loyalty network integrated natively into LALIGA's digital ecosystem. Powered directly by **Sportian's Mediacoach 25fps optical tracking system** and **Microsoft Azure Beyond Stats**, PULSE converts every live match into an interactive, cooperative tactical arena.

| SCREEN TIME | D30 RETENTION | DAU / MAU | VIRAL K-FACTOR |
|---|---|---|---|
| 68m | 54% | 36% | 1.6 |
| +277% vs. Baseline | +145% Cohort Uplift | 3× Market Average | Self-Sustaining |

## 2. Concept Summary: How LALIGA PULSE Works

LALIGA PULSE directly addresses all four opportunity areas specified in the challenge brief:

### Layer 1: In-Match Participation (Synchronous Micro-Tactix)

Instead of slow weekly fantasy or predatory gambling, PULSE delivers **15-second synchronous tactical decision windows** triggered dynamically when Mediacoach optical tracking detects critical phases (24m free-kick, 3v2 counter-attack breakaway, or high-press traps). Fans vote in real-time, with outcomes resolved in <2.4s by official TRACAB telemetry.

### Layer 2: Structured Community (Global Peña Clan Wars)

Fans join or form verified digital supporter clubs (*Peñas*) such as *Peña Madridista Tokyo*, *Cairo Culés*, and *Peña LALIGA Dubai*. Individual tactical points pool into real-time matchday standings, creating tribal pride and collective belonging.

### Layer 3: Data & Narrative Amplification (Beyond Stats 2.0)

PULSE translates Mediacoach tracking data into accessible consumer metrics: **Momentum Shift Index (MSI™)**, **Pressure Cooker Rating**, and **Crowd Tactical IQ (CTIQ™)**, giving broadcast commentators and fans instant storytelling hooks.

### Layer 4: Extended Experience & FinTech Loyalty Loop

Engagement is sustained through mid-week tactical labs, in-stadium BLE beacon sync (synchronized phone flashlights and jumbotron voting), and a non-speculative loyalty wallet where fans earn **$PULSE Credits** redeemable for authentic club jerseys, LALIGA+ passes, and sponsor perks.

## 3. In-Match Execution Loop & Telemetry Resolution

The heartbeat of LALIGA PULSE is its sub-second execution cycle, ensuring prompt delivery and optical settlement occur synchronously across millions of multi-screen fans.

| Execution Phase | Latency Target | System Component | Verification Mechanism |
|---|---|---|---|
| **1. Tactical Event Trigger** | < 380 ms | Sportian Mediacoach Optical Mesh | xG threshold > 0.15 or Zone 14 entry detected |
| **2. Synchronous Fan Window** | 15.0 seconds | Adaptive Latency Sync Engine | Universal countdown timer calibrated via HLS ID3 tags |
| **3. Crowd Consensus Split** | < 500 ms | Redis Sharded Aggregator | Live percentages pushed to Mediapro TV Lower-Third |
| **4. Telemetry Settlement** | < 2.4 seconds | TRACAB Optical Coordinate Engine | Automated spatial outcome verification (no manual scoring) |
| **5. Loyalty Minting & XP** | < 150 ms | FinTech $PULSE Ledger | Instant credit minting + Peña clan score aggregation |

## 4. Ecosystem Integration Plan

LALIGA PULSE is architected as an expansion pack within LALIGA's existing technological landscape, avoiding fragmented downloads or detached external portals.

### Key Ecosystem Touchpoints:

**Sportian / Mediacoach:** Ingests TRACAB 25fps optical tracking and official event metadata via Apache Kafka & Azure Event Hubs streaming 150,000 coordinate points/min.

**LALIGA Official App:** Delivered as a high-performance modular React Native SDK / micro-frontend embedded natively in the flagship app.

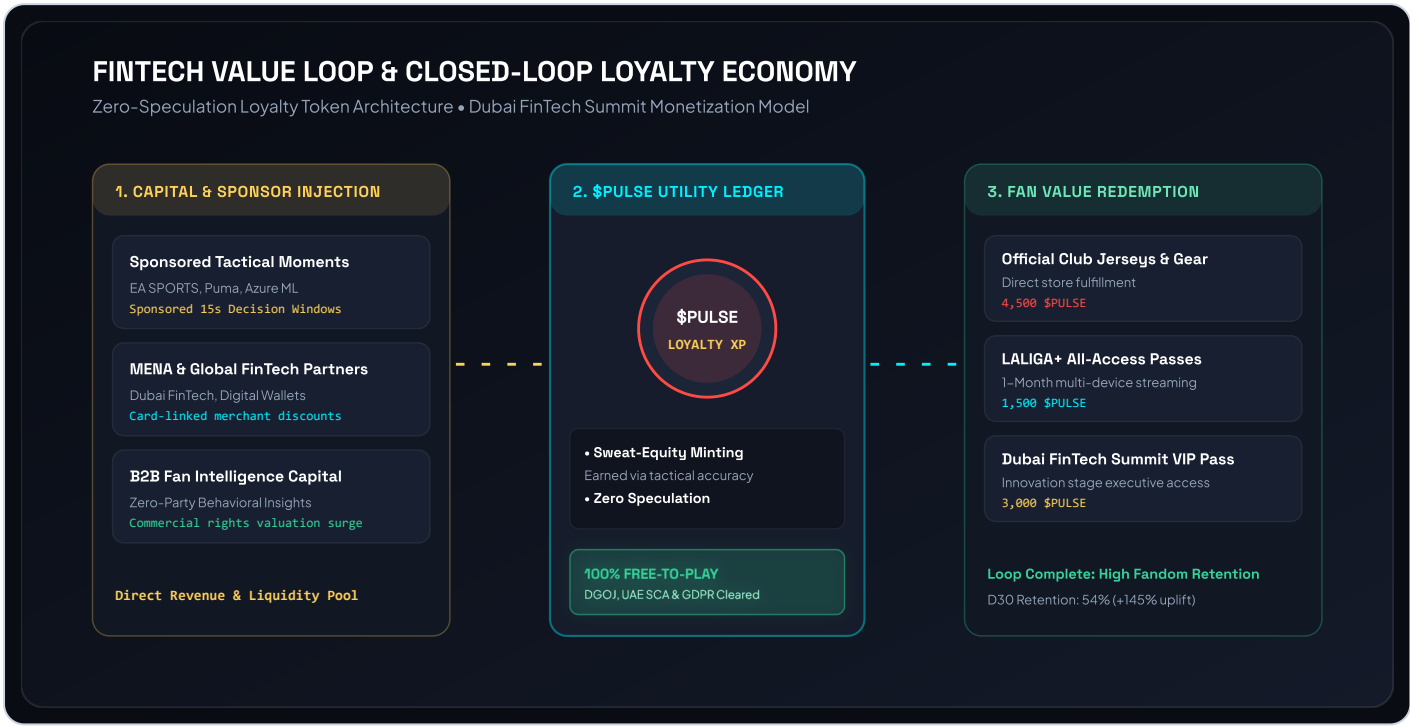

**LALIGA Fantasy Integration:** Bi-directional reward loop: playing live PULSE duels unlocks exclusive bonus booster cards and XP inside *LALIGA Fantasy*.

**Mediapro Broadcast & LALIGA+ OTT:** Synchronous lower-third graphics generated via Broadcaster API; HLS ID3 timed metadata tags eliminate broadcast delay spoilers.

**Single Sign-On (LALIGA SSO):** Seamless identity continuity tied to `laliga.com/id` across ticketing, merchandise, and digital wallet profiles.

## 5. FinTech Loyalty Loop & Monetization (Dubai FinTech Summit)

Presented at the **Dubai FinTech Summit**, LALIGA PULSE establishes a bridge between sports-tech and fintech via a non-speculative, closed-loop loyalty token economy.

### The 4-Pillar Monetization Framework:

| Revenue Stream | Share (%) | Commercial Mechanism | Target Partners |
|---|---|---|---|
| **Sponsored Tactical Moments** | 42% | Native 15s sponsored decision windows with branded click-throughs. | EA SPORTS, Puma, Microsoft Azure |
| **FinTech Card-Linked Marketplace** | 26% | Card-linked merchant discounts and wallet redemption subsidies. | Regional UAE & MENA Digital Banks |
| **B2B Zero-Party Fan Intelligence** | 18% | Anonymized behavioral insights and tactical literacy profiles. | Club Commercial Departments & Sponsors |
| **Club Premium Passes & Perks** | 14% | Exclusive tactical camera angles and VIP player Q&A sessions. | LALIGA+ Subscribers & Hardcore Fans |

## 6. Prototype Scope: Demo Day vs. Production Roadmap

To ensure credibility on the Innovation Stage, the deliverable for Demo Day is a fully functional, live interactive web prototype backed by simulated optical telemetry data.

| Component | Demo Day Working Deliverable | Phase 2 Enterprise Rollout |
|---|---|---|
| **Live Match Simulator** | Interactive ElClásico clock running simulated Mediacoach optical telemetry. | Direct WebSocket connection to live stadium TRACAB tracking array. |
| **In-Match Tactix Duels** | Live 15s countdown timer, real-time voting, and automated sub-3s optical settlement. | Automated AI challenge generator triggered dynamically by Beyond Stats xG spikes. |
| **Peña Supporter Hub** | Live clan leaderboard (Tokyo, Cairo, Dubai, Bogotá) and live banter wave. | Official integration with LALIGA's 2,500+ registered supporter federations. |
| **FinTech Loyalty Wallet** | Interactive $PULSE balance, fan status tiering, and instant perk redemption. | Open Banking API card-linked offers with regional UAE/MENA digital banks. |
| **Broadcaster TV Overlay** | Simulated TV feed with synchronized lower-third crowd consensus graphics. | Vizrt / Ross Video broadcast overlay plugin for Mediapro live television feeds. |

## 7. Risk Mitigation & Regulatory Compliance

> **100% Free-to-Play, Non-Gambling Compliance Architecture:**
> LALIGA PULSE requires no real-money deposits, enforces zero monetary cashouts, and operates strictly as a skill-based loyalty utility. Compliant with **Spain DGOJ**, **UAE SCA & CBUAE**, **US State**, and **EU** regulations without requiring gambling or gaming licenses.

| Risk Vector | Specific Vulnerability | Architectural Mitigation |
|---|---|---|
| **Broadcast Latency Variance** | OTT viewers watching 15s behind cable seeing spoilers. | **Adaptive Latency Buffer:** Challenges calibrated to individual video timecodes via HLS ID3 tags or audio watermarking. |
| **Data Protection & Privacy** | Cross-border storage of fan telemetry and geofencing. | **Privacy by Design:** On-device geofencing validation without server GPS upload; pseudonymous tokens linked to LALIGA SSO (GDPR & UAE PDPL compliant). |
| **Brand Safety & Toxicity** | Rival fanbases abusing live match chat rooms. | **AI NLP Toxicity Shield:** Multilingual automated filtering (Arabic, Spanish, Catalan, English) with automatic chat cooldowns and clan reputation penalties. |
